[lukalicheli.github.io/portfolio](https://lukalicheli.github.io/portfolio)

I am a Full Stack Web Developer that is collaborative, but also a strong, independent, problem solver. My strong suit is developing an intuitive user interface and never being afraid of a challenge. Documentation is my best friend, along with having relentless tenacity with debugging errors. A great testament to my adaptability and capacity to learn is the successful completion of a short, but vigorous Full Stack Web Development program that I successfully completed in UCSD.

## Work History

### Massage Envy

- Experience working with and managing customers.
- Supported operations team with day-to-day requests related to website functionality, user experience and performance.
